

Team Building

- Today you'll formally build your team
- Decide how your team will make decisions
- Managing your team's work
- Choose a team name
- Sign an agreement
- Delegate first task

How teams make decisions

- As a team you want to all agree on how to make decisions – you have to decide how to do this beforehand though
- Today you'll decide
 - Leader (Whole team leader, each a leader of one role, mix of both?)
 - Decision making (Leader decides (authoritarian) or team decides (democratic))

Managing work

- You need to decide as a team the answer to these questions
 - How will your team feedback and communicate? (meetings, posts on Teams, mix etc)
 - Where will you keep and share your planning and other files?
 - How will your team flag any issues or get help?
 - What will you do if a team member is behind on their work?

Team Name

- Want a name that symbolises who you are as a team
- Can change a bit at the start but discuss and choose an initial one

Team Agreement

- I've given you a rough template, add / tweak to fit you best
- You'll need to decide what is being discussed today, these slides are ready for you to work through
- Make sure agreement is all done by end of today

First Task – Team agreement

1. Complete the team agreement, discuss each point before writing it up and signing
2. Create a new Team, invite me and everyone else in (make sure I have admin access so I can start Meetings)
3. Decide on channels, upload your Team agreement, the task requirements and any other documents or links

Second Task – Analysing requirements

1. Read the Animal Board Game requirements PDF from the Y1 Computer Science team > Files
2. What game does it remind you of?
3. Put together your team's questions ready to ask
4. Start thinking about and documenting your initial thoughts about what classes you will need and what attributes and methods they will have
